## **Boil Water Notice Rescinded (Customers off FM 80 Only).**

**On October 15, 2024**, The Texas Commission of Environmental Quality (TCEQ), required the Point Enterprise WSC #1470010 (public water supply), of FM 80, to issue a Boil Water Notice to inform customers/individuals/employees that due to conditions which occurred recently in the public water system, the water from this public water system was required to be boiled prior to use for drinking water/human consumption purposes.

The public water system has taken the necessary corrective actions to restore the quality of the water distributed by this public water system used for drinking water/human consumption purposes and has provided TCEQ with laboratory test results that indicate the water no longer requires boiling prior to use as of October 18, 2024.

If you have questions concerning this matter, please contact Robert Murphey at 254-562-6295.
